# Storming The Palace

~~Mini-tutorial~~

1 - What is Storming the Palace for Golden Palace G8F v2?

Storming the Palace for G8F Golden Palace is a set of morphs, shaping presets and collision tools. It works only for the v2 version of Golden Palace (it is best use the June 2019 update).
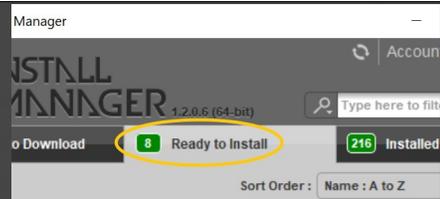

2 - How to install it? [two possibilities]

A - Using DAZ Installation Manager

– Locate your DIM zip directory: Open DIM, click on the upper right gear, click on the 'Downloads' tab, and locate the Package Archive directory:
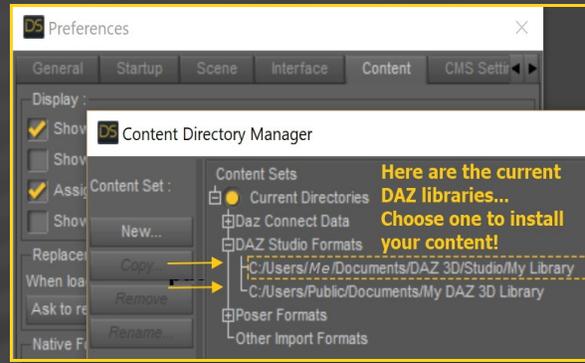

– Copy in it both the zip (do not unzip it) and the dsx files;

– Refresh DIM (couple of round arrows at the top), and enable the 'Ready to Install' tab. Locate the product, and click 'Install'... done!
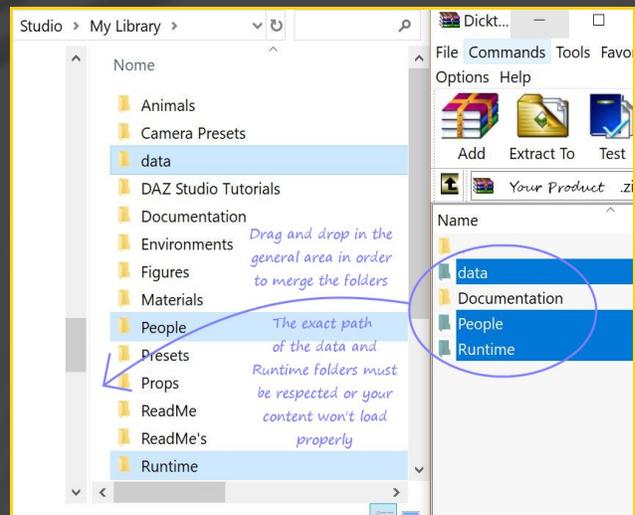

Remember that in the DIM settings, you can choose the destination library.

B – Manual procedure

Locate your main DAZ folder. It may be something like C:\Users\Public\Documents\My DAZ 3D Library.

Drag and drop in the general area in order to merge the folders

The exact path of the data and Runtime folders must be respected or your content won't load properly

Merge the contents of the .zip file with your main DAZ folder, where your G8M content is installed. For MAC users: follow instructions here:
http://www.renderotica.com/community/forums.aspx?g=posts&t=204659&cmsg=0&cmsn=

---> It is important that the *data* and *Runtime* folders are properly installed in your content library folder with the exact path provided in the zip (installing in a sub-folder is a common mistake), otherwise textures won't be found.

3 - Where is my content?

You can access to the presets in your Content Library tab under People/Genesis 8 Female/Anatomy/Golden Palace v2/7-Storming the Palace:

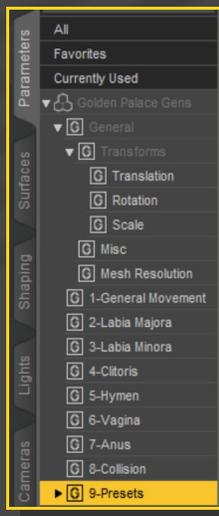

Morphs and presets can be dialed in the parameters tab:

4 – Presets

Having G8F or any of its nodes selected, load the graft selector and any Golden Palace preset.

Use the full presets for a quick full setup:

The other ones can be mixed or can be used to edit the present shape:

All presets can be dialed in the Parameters Tab and can be freely mixed.

A couple of bonus examples have been included with a mix of presets:

5 – Collisions

• Check the collisions tutorial! You can find it here:
