

GOLDEN PALACE G8F

v2

~~Mini-tutorial~~

1 - What is Golden Palace for G8F v2?

Golden Palace is a posable graft genitalia that will blend with Genesis 8 Female default figure. It comes complete with pussy and anus.

The v2 version adds a new surface for the anus, so the scripts are updated. There are several other improvements too: morphs, hairs, etc.

2 - How to install it? [two possibilities]

A - Using DAZ Installation Manager

– Locate your DIM zip directory: Open DIM, click on the upper right gear, click on the 'Downloads' tab, and locate the Package Archive directory:

– Copy in it both the zip (do not unzip it) and the dsx files;

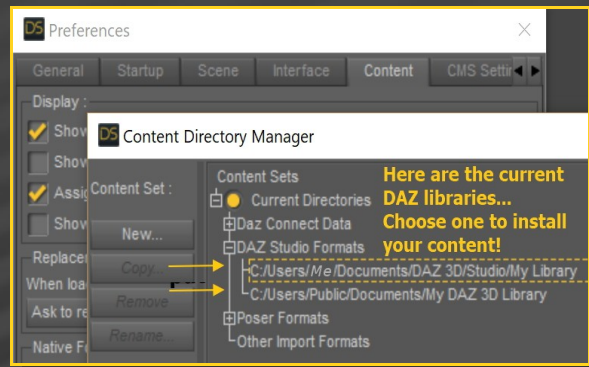

– Refresh DIM (couple of round arrows at the top), and enable the 'Ready to Install' tab.

Locate the product, and click 'Install'... done!

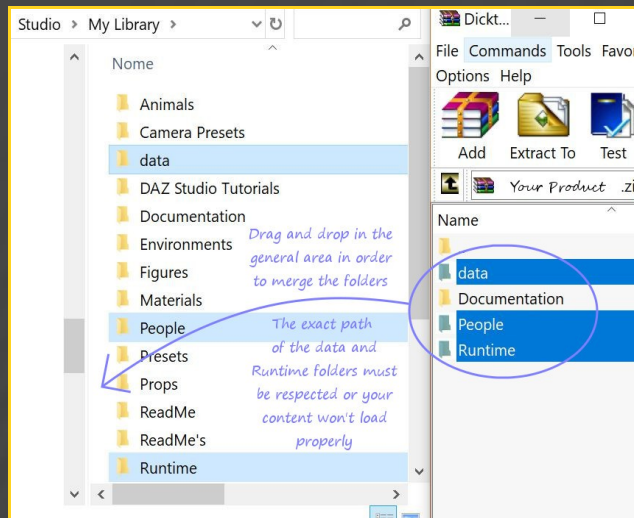

Remember that in the DIM settings, you can choose the destination library.

B – Manual procedure

Locate your main DAZ folder. It may be something like C:\Users\Public\Documents\My DAZ 3D Library.

Merge the contents of the .zip file with your main DAZ folder, where your G8M content is

installed. For MAC users: follow instructions here:

<http://www.renderotica.com/community/forums.aspx?g=posts&t=204659&cmsg=0&cmsn=>

---> It is important that the **data** and **Runtime** folders are properly installed in your content library folder with the exact path provided in the zip (installing in a sub-folder is a common mistake), otherwise textures won't be found.

3 - Where is my content?

You can access to the graft and presets in your Content Library tab under People/Genesis 8 Female/Anatomy/Golden Palace v2:

4 – Quick Setup

Load G8F in the scene, and with it selected, load '1_Golden Palace v2', '2_Golden Palace Shell v2', '3_Golden Palace Material Copy v2':

5 – Options

If you want to colorize the gen, select G8F or any of its nodes, and call the colorizing script:

Selector scripts have been included for any of the following options. Just select G8f or any of its nodes, the selector script, and the preset/follower.

- You can shape the glutes...

...or the genitalia.

You can set the anus dimeter...

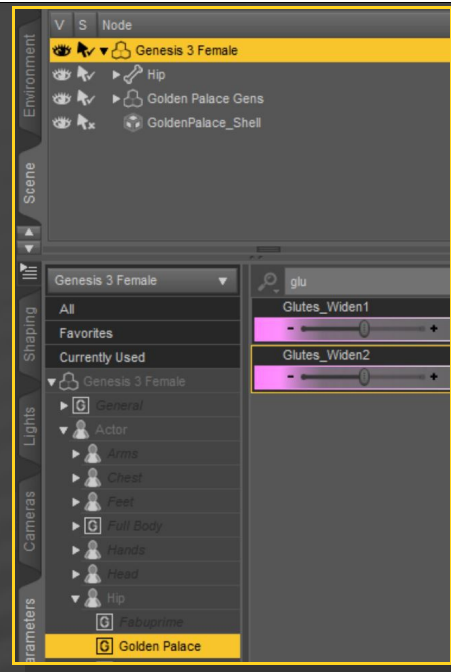

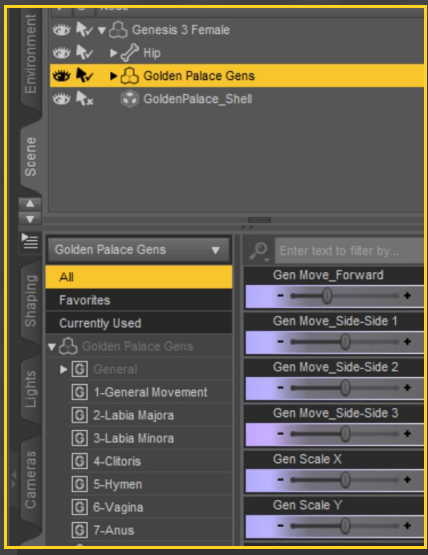

...load a bonus squirt...

...or two fibermesh hairs, with three texture options:

Remember to check the many Golden Palace morphs in the Parameters Tab:

Load the '**Shell Fix**' script on any shell in order to solve conflicts (gray surfaces) with the eyelashes or other grafts (Headlights, etc.):

There are two other morphs in the parameters tab under People/Genesis 8 Female/Actor/Hip/Golden Palace. They can be tweaked manually or dialed using the presets included in the '3-Basic Shaping Presets G8F' folder:
